

VEXCON STARSEAL® PS CLEAR SYSTEMS

VEXCON STARSEAL CLEAR:

Product: StarSeal PS Clear

Description: Clear penetrating floor hardener and densifier which reacts with the calcium and free lime in the concrete to form a chemical and wear resistant, dust free and water repellant concrete floor. Can be applied to new or existing concrete. Polishing, although not required, immediately after application produces a glossy lifetime finish. Economical and maintenance free. A 20-year factory warranty is available. Additional product information is available by referring to the product technical data sheet.

Primary Application Areas: Interior and exterior concrete surfaces such as, warehouse and industrial floors, parking structures, driveways, entrance and walkways, and stadiums where there is no exposure to food. Can be applied over neutralized acid stains or integrally colored or shake on hardened concrete.

VEXCON STARSEAL CLEAR FSR:

Products: StarSeal PS Clear, StarSeal Fixative and StarSeal PS Finish Coat or (WB)

Description: Clear penetrating floor hardener and densifier, which reacts with the calcium and free lime in the concrete to form a chemical and wear resistant, dust free and water repellent concrete floor. Can be applied to new or existing concrete. Improved chemical and resistance to food acids is achieved with the application of StarSeal Fixative and Finish Coat. This system is USDA approved. Polishing, although not required, immediately after application produces a glossy lifetime finish. A 20 year factory warranty is available. Economical and maintenance free. Additional product information is available by referring to the product technical data.

Primary Application Areas: Concrete applications such as, restaurants, shopping malls, kitchens, food courts, schools, pool decks, stadiums, counter tops, food markets and food handling areas. Can be applied over neutralized acid stains or integrally colored or shake on hardened concrete.
