

Vexcon Fusion™

Invisible Surface Repair Treatment

Fusion* and Fusion LG are advanced silicate repair treatments for polished concrete floors and concrete. Fusion technology makes large and small surface imperfections such as crazing, pin holes, pop-outs and divots blend into the concrete. While other types of floor repair materials will discolor, become brittle or are incompatible with densifier chemistry, Fusion repairs the concrete yielding a consistent natural looking floor.

*Patent Pending

- Use with all Certi-Shine® and StarSeal® PS polishing systems
- Increases the gloss and clarity of the finished floor
- Compatible with all densifier, stain, and dye systems

- For both large and small surface repair
- LEED points
- Grinding and honing can quickly continue one hour after application
- Yields a smoother, denser surface

Concrete solutions for architects, engineers and builders since 1974
